Web Development

Project Overview

The brief, deliverables, and project scope

The Brief

Design a comprehensive brand identity and homepage for IDR — an industry-led training and deployment institute focused on digital, cyber and AI risk.

1. **Logo Design**
   Icon-only + icon + text variants
2. **Responsive Website**
   Fully responsive single-page design

IDR bridges the gap between academic knowledge and industry practice in digital risk management.

Goal

Communicate IDR's identity clearly and professionally while establishing credibility in the digital risk training sector.

Platform

Desktop + Mobile responsive design with breakpoints at 1024px, 768px, 480px, and 360px.

Stack

Vanilla HTML / CSS / JavaScript — no frameworks, no libraries, pure code.

Logo Design Rationale

Symbolism, color psychology, and typography choices

IDR

Institute of Digital Risk

Shape

Faceted hexagonal cube — symbolises structure, resilience, and the multi-dimensional nature of digital risk. The geometric precision reflects IDR's analytical approach.

Colour

Orange (#FF6B00) on black — energetic, authoritative, high-contrast and legible at all sizes. The warmth of orange balances the seriousness of risk management.

Typography

Inter — modern, clean, and precise. Legible from favicon to large display. The geometric sans-serif complements the logo's angular form.

Icon Only

For favicons, app icons, and small applications

Icon + Wordmark

IDR

For headers, branding, and official documents

Page Architecture

Six strategic sections guiding the user journey

#	Section	Purpose	Key Elements
	Hero	First impression — establishes mission, credibility, and visual identity	HeadlineCTAsStats3D Cube
	About IDR	Institute story, mission, and UK university partnership credentials	StoryPartners
	Services	Three core pillars — Academy, Innovation & Incubation, Advisory	3 CardsIcons
	Pipeline	Visual process flow: Train → Hire → Innovate → Deploy	4 StepsFlow
	Community	Who IDR serves — students, professionals, organizations, partners	AudienceLogos
	Contact	Register-interest form with validation and clear CTA	FormCTA

Visual Design Language

Colour palette, typography, and design principles

Colour Palette

Brand Orange
#FF6B00
Buttons, accents, highlights

Black
#0A0A0A
Main background

Card Surface
#141414
Cards, panels

White
#E8E8E8
Primary text

Typography

Inter 900 Headlines
Bold, commanding presence for section headers and key messages

Inter 600 Subheadings
Clear hierarchy for card titles and navigation elements

Inter 400 Body Text
Readable and comfortable for longer content and descriptions

Design Style

- Dark Mode
- Glassmorphism
- Orange Glow

Hero — First Impression

Key design decisions that establish immediate credibility

01 Mission-Driven Headline

"Advancing the Future of Digital Risk" — confident, forward-looking, and immediately communicates IDR's purpose.

Clear | Authoritative | Memorable

02 Interactive 3D Cube

Rotates continuously, tilts with mouse movement — communicates the technical identity of IDR and creates engagement.

CSS 3D | Interactive | Parallax

03 Glowing Grid Background

Subtle tech aesthetic with orange radial light sources — creates depth without distracting from content.

Atmospheric | On-brand

Stats Bar — Credibility Signals

3+	UK	100%
Service Pillars	University Partner	Industry-Led

Design Principle: The hero section establishes trust within 3 seconds through clear messaging, visual sophistication, and credibility indicators.

Three Core Service Pillars

Comprehensive offerings across the digital risk spectrum

PILLAR 01

Academy

Bootcamps, upskilling pathways, certifications and university-validated programmes for students and professionals entering digital risk.

- Intensive bootcamps
- Professional certifications
- University partnerships

PILLAR 02

Innovation

Developing AI governance models, RegTech frameworks and research-backed intellectual property alongside industry partners.

- AI governance models
- RegTech frameworks
- Research-backed IP

PILLAR 03

Advisory

Helping organisations implement compliance frameworks — NIST, ISO 27001, NIS2 — with deployment-ready IDR graduates.

- Compliance frameworks
- NIST / ISO 27001 / NIS2
- Deployment-ready talent

Integrated Approach: These three pillars work together — Academy trains, Innovation develops, Advisory deploys — creating a complete digital risk ecosystem.

Train → Hire → Innovate → Deploy

The complete IDR talent and innovation lifecycle

1

Train

Recruit talented students and professionals and build their competence through intensive, industry-aligned programmes.

→

2

Hire

Place IDR graduates and certified professionals into regulated industry sectors with immediate impact.

→

3

Innovate

Incubate new risk frameworks, AI governance tools and research-backed IP with industry collaboration.

→

4

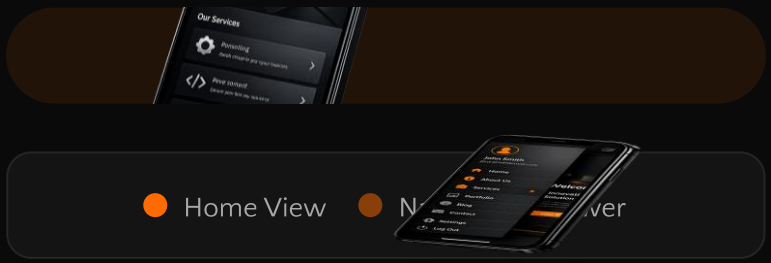
Deploy

Embed practitioners into live environments across financial services and critical infrastructure.

500+	85%	12	50+
Students Trained	Placement Rate	Frameworks Developed	Partner Organizations

Mobile-First Responsive Design

Seamless experience across all device sizes



Breakpoint Strategy

1024px	768px	480px	360px
Tablet Landscape	Tablet Portrait	Mobile Large	Mobile Small

Key Responsive Features

- **Slide-out Mobile Navigation**
  Animated hamburger → ✕ transformation with smooth drawer animation
- **Single-Column Layouts**
  Content reflows to single column on small screens for optimal readability
- **Persistent Hero Stats**
  Key statistics remain visible in one row across all screen sizes
- **Vertical Pipeline Reflow**
  4-step pipeline transforms from horizontal to vertical stack on mobile

Built to Brief — Technical Decisions

Pure code implementation without frameworks or libraries

Semantic HTML5

Proper use of header, nav, main, section, and footer elements for accessibility and SEO

CSS Flexbox + Grid

Modern layout techniques without any CSS frameworks — pure custom styling

Sticky Glassmorphic Nav

Frosted glass effect navigation with smooth scroll behavior and backdrop blur

Scroll-Reveal Animations

IntersectionObserver API for performant scroll-triggered element reveals

Form Validation

Custom vanilla JavaScript validation with real-time feedback and error handling

Interactive 3D CSS Cube

Pure CSS 3D transforms with mouse-parallax tilt effect — no WebGL, no libraries

Zero Dependencies

No Bootstrap, no Tailwind, no libraries — every line of code written from scratch, demonstrating mastery of core web technologies.

Deliverables

Access the complete project

Live Website

Fully deployed and responsive website hosted on Vercel

idr-website.vercel.app

GitHub Repository

Complete source code with version history and documentation

github.com/Satyam8589/idr-website

Documentation

Comprehensive README with setup instructions and project details

Full documentation in the repository

Thank You

Designed and built with precision — matching IDR's commitment to rigour, technical excellence, and industry readiness.
